# Front Wheel Drive Lower Ball Joints

**General Motors** 

## **PROBLEM:**

#### Premature ball joint wear

 Lateral deflection (side to side) loading causes excessive wear in ball joint.

LATERAL MOV	EMENT WIT	HIN HOUSING

Make / Model / Year	Replacement Part No.
Buick Century 82-96; Skylark 80-85; Chevrolet Celebrity 82-90; Citation 80-85; Chevrolet Truck Lumina APV 90-91; Oldsmobile Cutlass Ciera 82-96; Omega 80-84; Oldsmobile Silhouette 90-91; Pontiac 6000 82-91; Phoenix 80-84; Pontiac Truck Trans Sport 90-91	K5263

### SOLUTION:

# MOOG<sup>®</sup> improved design K5263

- Utilizes patented MOOG cover plate design and NASCARproven split-bearing technology, which eliminates the excessive radial deflection often experienced with high lateral loads. The ball joint assembly maintains maximum ball-to-bearing contact for greater load carrying capability.
- Belleville washer pre-load provides lower torque and stud articulation with minimal axial clearance.
- Hardened powdered-metal bearings provide a smooth, durable wear surface that extends service life.
- A flange-style sealed boot equipped with a special greaserelief valve keeps contamination out and provides a serviceable sealed environment. (see drawing for Solution)

The Problem Solver"
