

RENEGADE BULL BAR

What Bull Bar fits your Renegade?

Is your Renegade a Trailhawk?.....You need KJ50005BK

Is your Renegade a Sport?.....You need KJ50006BK

If your Renegade is **NOT** a Sport or a Trailhawk.....

If you DO HAVE the block.....you need KJ50006BK

If you DO NOT HAVE the block.....you need KJ50011BK

Another way to check: When you turn on your turn signals at night while your headlights are on, does that also turn on your front fog lamp on the same side as you are turning? This is called the CORNERING FRONT FOG LAMP option. You can also call your vehicle dealer with your V.I.N., and they can check if you have sales option code 'LNJ', which includes the CORNERING FRONT FOG LAMP option. This option will cause the small black block to be installed on your Jeep and you will need KJ50006BK.
